## EDUCATION

2016 - 2022

UNIVERSITY

- Cybersecurity Engineer

2013 - 2016

HIGH SCHOOL

- Bachelor of Experimental Sciences

## PROFILE SUMMARY

I am a highly skilled cybersecurity and software engineer with extensive experience in full-stack web development. I use technologies like Large Language Models (LLMs) and deep learning to create innovative applications such as AI agents, AI automation, and predictive analytics tools. My expertise extends to data analytics, intelligent decision-making systems, and crafting exceptional digital experiences tailored to diverse industries. With a strong foundation in both backend and frontend development, I am dedicated to delivering secure, efficient, and impactful solutions.

## SKILLS

- Expertise in cybersecurity
- Full-stack web development
- Proficient in using Large Language Models (LLMs) and deep learning technologies
- Skilled in developing AI agents and AI automation solutions

## WORK EXPERIENCE

**AI Solutions Developer**

2023- Present

Private Company

- Developed cutting-edge AI solutions leveraging LLMs, including OpenAI and LLaMA models, for a range of applications such as AI-powered chatbots, automation systems, and predictive analytics tools.
- Integrated AI models into production environments, optimizing their performance and scalability.

**Full Stack Developer**

2019-- Present

Freelance

- Designed, developed, and maintained scalable web applications with seamless integration between frontend and backend systems.
- Built responsive user interfaces using modern JavaScript frameworks like React and Next.js, ensuring exceptional user experiences.
- Developed and optimized RESTful APIs endpoints to enable efficient data exchange.
- Implemented secure authentication systems, adhering to best practices in cybersecurity.
